

Water Blaster

Key Features:

- ROV mountable
- Easy to integrate
- High Flow

WHATS INCLUDED

2 Stage Water Pump

Hose Kit

Jet Nozzle

Operations Manual

Certification Pack

Description

The Excav8 ROV Water Blaster offers a solution for hard clay scenarios where the end user wants to fluidize the clay prior to excavating.

This is the same motor and water pump used on our 6" Dredges for ease of parts for current customers.

Our tools have been designed by ROV technicians who understand how important it is to have an easy to integrate and operate systems.

Excav8 can supply a range of additional equipment to support operations such as dirty work packs, intelligent valve packs, robust manipulators, excavation skids for an easy plug and play solution.

We have a range of dredge pump sizes for different applications.

Overall Specifications	
Hydraulic Input Flow	50-80 L/min (13-21G/Min)
Optimal Hydraulic Pressure	180-210 bar (2610-3000 PSI)
Output Water Flow	2,200 L/m
Output Water Pressure	3.8 Bar
Dimensions: L x H x W	720mm x 310mm x 230mm
Weight in Air / Water	29KG
